

Technical Data Sheet

Speaker Mesh

Speaker Mesh is 7 oz. PVC coated polyester mesh, printable on two sides with UV and Solvent inks. Allowing 70% air-flow through, this large-holed mesh is designed with a special scrim pattern that runs through the open holes and catches more ink for optimal ink coverage. Speaker Mesh is best suited for acoustical applications (over concert/venue speakers) or enormous images on building and stadium wraps, murals, protective barriers for scaffolding as well as theatrical and TV backdrops. Available in seamless wide-widths ranging from 126"- 196".
