Mutoh's new ValueJet 1626UH – UV-LED Hybrid printer lets you print directly onto corrugated plastics, polystyrene, PVC, acrylic, Polycarbonate, foam board, aluminum composite, banner, wall covering and more

UV-LED Ink

Our UV-LED Ink is 100% solid meaning no VOCs or HAPs making it safer for the environment and gives you high performance on rigid substrates and prints beautifully on roll vinyl surfaces with an exceptionally wide color gamut.

For the packaging/prototype and signage markets

Print on rigid substrates and roll media, plus print using white ink and varnish which allows you to create layers for an embossed effect. Its dual function design saves you valuable floor space and is ideal for printing packaging prototypes, POP displays and indoor signage. The VJ1626UH comes with Mutoh's VSM (ValueJet Status Monitor) app for remote printer management, and the half inch print height, faster speeds, and optional SpectroVUE VM-10 Spectrophotometer makes the VJ1626UH the smart choice for any size print shop.
