SubliJet[®] R

Sublimation Printing System

MAKING MONEY WITH SUBLIJET-R
IS AS **EASY** AS...

CREATE. PRINT. PRESS.

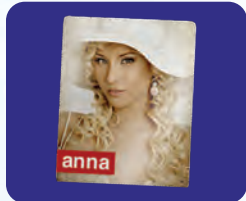

Make More Money with SubliJet-R!

Make more money with the SubliJet-R Sublimation Printing System! SubliJet-R is the fastest, easiest and lowest cost way to produce the widest range of professionally customized and personalized products. No special skills required, simply Create – Print – Press! It's the ideal tool for starting a new business or for adding another profit center to an existing enterprise.

Profits On-Demand

Unlike many other forms of digital decoration, the setup time and cost for sublimation is virtually zero. With SubliJet-R, it's just as easy to do one piece as it is one hundred pieces meaning you can handle any job that comes in the door.

Premium Margins

Personalized products generate higher margins! An 8" x 10" full color, photographic quality image can be printed for as low as \$0.60 (ink & media costs) meaning you can create custom products for your customers with plenty of margin for yourself.

Budget-Smart Startup Costs

With systems starting at less than \$450 (not including a heat press) a SubliJet-R solution is within easy reach of any entrepreneur.

High-Speed Production

Ricoh Systems for SubliJet-R can easily print as many as 144 color, high resolution images in an hour. Try doing that with other decoration processes like screenprinting, direct-to-garment or embroidery.

Extreme Versatility

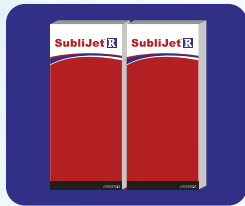

While coffee mugs, mouse pads and t-shirts remain top sellers, there are hundreds of different sublimation friendly products; promotional products, corporate gifts, photo gifts, awards, poly performance apparel, sports bottles, ceramic tile, home décor and more...

SubliJet-R - PICTURE PERFECT DIGITAL DECORATION SYSTEM

The SubliJet-R Difference

SubliJet-R is a unique high viscosity gel sublimation ink formulated specifically for Ricoh business class print engine. Touting fast printing speeds, high capacity cartridges and a low maintenance design, Ricoh offers a new choice in both start-up and high-volume sublimation printing. The key to the patented SubliJet-R system is the chemical process. When sublimation inks are heated to 400 °F, they turn into a gas and form a permanent bond with polyester fabric and polymer coatings. The result is a premium, full-color, photographic quality image that will not crack, peel or wash away.

Gel-Based Formulation in High-Capacity Cartridges

A gel-based formulation, SubliJet-R is packaged in high-capacity cartridges for maximum reliability and extended uninterrupted printing.

Extreme Versatility

Thanks to the extreme versatility of Sawgrass' sublimation printing technology, SubliJet-R can decorate a wide variety of polyester fabrics and polymer coated hard substrates; metal, ceramic, glass, FRP plastic, poly performance fabrics, hard board and more...

Vibrant Color

SubliJet-R delivers extremely vibrant colors and stunning resolution at levels that other digital processes simply cannot match. It's the top choice for professional photographers and digital imagers that demand precision and fine detail in every image.

Superior Durability

Don't settle for surface decoration technologies like screen printing, pad printing, lamination or vinyl. With the sublimation printing process, the image is actually infused into the surface of the substrate itself, and will not crack, peel or wash away.

PowerDriver-R & ColorSure Palette

Included with SubliJet-R, PowerDriver with ColorSure Palette makes printing beautiful transfers a breeze. Powerful features enable users to easily optimize color output for photographs, vector graphics or spot colors. With handy features like Color Finder, you can even create a custom palette, ready to use on future jobs!

PartnersPlus

PartnerPlus is our comprehensive user support program; Real-time Product Support, Color Management Software Support, Full Product Warranty, Technical Phone Support for Printers that are Under OEM Warranty - 100% Satisfaction Guarantee!

RICOH
